the present work reflects a multi disciplinary effort to address the topic of confined hydrosystems developed with a cross fertilization panel of physics chemists biologists soil and earth scientists confined hydrosystems include all situations in natural settings wherein the extent of the liquid phase is limited so that the solid liquid and or liquid air interfaces may be critical to the properties of the whole system primarily this so called residual solution is occluded in pores channels in such a way that decreases its tendency to evaporation and makes it long lasting in arid earth deserts and hyper arid mars soils areas the associated physics is available from domains like capillarity adsorption and wetting and surface forces however many processes are still to understand due to the close

relationship between local structure and matter properties the subtle interplay between the host and the guest the complex intermingling among static reactivity and migration pathway expert contributors from israel russia europe and us discuss the behaviour of water and aqueous solutes at different scale from the nanometric range of carbon nanotubes and nanofluidics to the regional scale of aquifers reactive flow in sedimentary basins this scientific scope allowed the group of participants with very different background to tackle the confinement topic at different scales the book is organized according to four sections that include i flow from nano to mega scale ii ions hydration and transport iii in pores channels cavitation iv crystallization under confinement most of contributions relates to experimental works at different resolution interpreted through classic thermodynamics and intermolecular forces simulation techniques are used to explore the atomic scale of interfaces and the migration in the thinnest angstrom wide channels

this book is the best source for the most current relevant cutting edge research in the field of industrial informatics focusing on different methodologies of information technologies to enhance industrial fabrication intelligence and manufacturing processes provided by publisher

the definitive military history of the civil war featuring the same exclusive images tactical maps and expert analysis commissioned by the united states military academy to teach the history of the art of war to west point cadets the united states military academy at west point is the gold standard for military history and the operational art of war west point has created military history texts for its cadets since 1836 for the first time in over forty years the united states military academy has authorized a new military history series that will bear the name west point that text has been updated repeatedly but now it has been completely rewritten and the west point history of the civil war is the first volume to result in a new series of military histories authorized by west point the west point history of the civil war combines the expertise of preeminent historians commissioned by west point hundreds of maps uniquely created by cartographers under west point s direction and hundreds of images many created for this volume or selected from west point archives offering careful analysis of the political context of military decisions the west point history of the civil war is singularly brilliant at introducing the generals and officer corps of both union and confederacy while explaining the tactics decisions and consequences of individual battles and the ebb and flow of the war for two years it has been beta tested vetted and polished by cadets west point faculty and west point graduates and the results are clear this is the best military history of its kind

available anywhere this is the standard ebook edition it is a reproduction of the hardcover edition it does not include any enhanced or interactive features
